No Deet! – Was developed by US Army in 1946

- Deet deforms polyester clothing, spectacle frames, safety hard hats, golf grips & most plastic. Suppresses our bodies natural release of carbon dioxide from the lungs, lactic acid from our muscles, ammonia from our skin.
- 17% of Deet is absorbed into our blood & stays in our muscles for 3 months.
- Reported side effects; hypotension (cardiovascular), confusion, lethargy, headaches, tremors (nervous system), rashes, wheals anaphylaxis (allergic)
- Children absorb more Deet than as their skin surface to weight ratio is higher.
